Vendor: Cisco
Audit ID: 6ab8dbbaf83eb71667008100
Generated: 27/9/2026, 2:42:46 pm

Compliance Score

50%

Audit Summary

Total Checks: 4
Passed Checks: 2
Failed Checks: 2
Critical Findings: 0
High Findings: 2
Medium Findings: 0
Low Findings: 0

Security Findings

1. Telnet Enabled

Severity: High
Category: Remote Access
Description: Telnet is enabled for remote administration. Telnet does not provide encrypted communication and may expose credentials and session data.
Detected Configuration: transport input telnet
Recommended Fix: Disable Telnet and use SSH for secure remote administration.

2. Plaintext Enable Password

Severity: High
Category: Authentication
Description: A plaintext enable password was detected in the Cisco configuration.
Detected Configuration: enable password admin123
Recommended Fix: Replace the plaintext password with an encrypted secret using 'enable secret' and protect configuration access.
